

Drone Warfare and Lawfare in a Post-Heroic Age (Rhetoric, Law,

First appearing in 1996, and ranging in subject from England's poor laws to the Human Genome Project, this was one of the first books to look at the history and development of the eugenics movement in Anglo-American culture. Unlike other works that focus on the movement's historical aberrancies or the claims of its hardline proponents, this study highlights the often unnoticed ways in which the language and ideas of eugenics have permeated democratic discourse. Marouf A. Hasian Jr. not only examines the attempts of philosophers, scientists, and politicians to balance the rights of the individual against the duties of the state but also shows how African Americans, Catholics, women, and other communities—dominant and marginalized—have appropriated or confronted the rhetoric of eugenics.

"Adds a truly new dimension to the study of eugenics . . . This book provides a powerful service to those of us embroiled in the controversy about the social criticism of science. It shows that the question: good science or bad science? does not work. . . . A valuable addition not only to the eugenics literature but also to the critical literature on the social study of science."
— *Journal of American History*

"Although attention has been given to the thought of the (in)famous proponents of eugenics, insufficient attention has been given to the way in which the rhetoric of eugenics has been received among the general public of the early twentieth century. Marouf Hasian's accessible and easily read book fills this gap in the recent scholarship."
— *Research in Philosophy and Technology*

"Rhetorical critics of science owe a debt to Marouf Hasian for providing an excellent example of the contribution the rhetoric of science can make to rhetorical studies and to general scholarship."
— *Quarterly Journal of Speech*

"A valuable contribution to the history of eugenic thought and activity in early twentieth-century England and the United States."
— *Isis: A Journal of the History of Science Society*

"Notably elucidates the issues involved in past and, by extension, current efforts to improve human genetics . . . Examines thoroughly and engagingly the cultural context that permitted eugenics to flourish after 1900 and the mechanisms, rhetorical as well as scientific and institutional, by which eugenics promulgated itself."
— *American Literary History*

"The very rich material analyzed by Hasian adds several new dimensions to our understanding of the multiplicity of responses to eugenic science."
— *Journal of the History of Biology*

MAROUF A. HASIAN JR. is a professor of communications at the University of Utah. His books include *Forensic Rhetoric and Satellite Surveillance: The Visualization of War Crimes and Human Rights Violations*, *Representing Ebola: Culture, Law, and Public Discourse about the 2013–2015 West African Ebola Outbreak*, *Humanitarian Aid and the Impoverished Rhetoric of Celebrity Advocacy*, and *Drone Warfare and Lawfare in a Post-Heroic Age*.
